OK, so I'll forward Tierra the number for 4:00. I was also thinking of forwarding them the agenda items they could expect to talk about on our call. The items I figured it would be good for them to be included on are:

possible RA visit to the Lister Ave site - what if anything we may want them to show or be able to talk about while there (if we go there). I already got their OK that they'd be available to let us on site if we choose to go there.

Tierra's presentation for March 11th CAG - how long and particular topics we'd like them to cover
setting up of dry run date for March 11th CAG presentations
removal abstracts for the Passaic River Symposium - what presentations should be given and who should give them

While they're not on the phone the other agenda topics seem to be:

overall logistics for the RA's Ironbound visit - where to go, how many & who can go along, etc.
overall agenda for March 11th CAG - other presentations - what should be done while the RA is there versus after she leaves
duties for each of us that day - does RA tour time overlap with CAG meeting setup time
2010 calendar changes/additions - add clean energy/industry, modeling of 17 miles, vision for the river and CIP update
values
subcommittees
letter requesting TASC support

Please let me know if you agree with this list before I send the first half along to Tierra with the call-in info.
Thanks!
Elizabeth

let's invite Tierra to call at 4:00...good idea....and we should probably have the call in number in our back pocket tomorrow in the event that we call in from home due to bad weather.....I've heard an updated forecast just now which has potential to be a whopper of a storm here in or near the city.....early release perhaps, but I still want to try and have the call at 3:30 regardless

thanks

Subject Re: PassaicCAG/Symposium Conference Call: Friday, Feb 26 @ 3:30 PM

Given that there are a number of items on the agenda which involve Tierra, could we include them in part of the call? Say have them call in at 4:00 and have them drop off when we finish with their parts?
